

Factsheet Criminal records extract

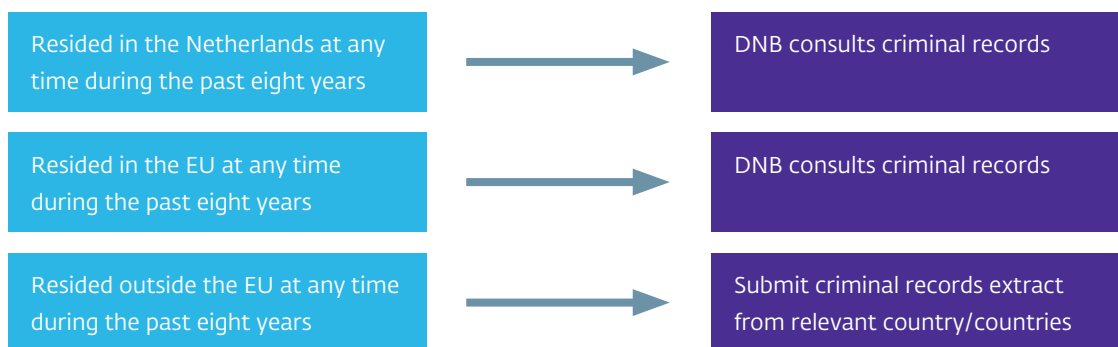

for a propriety assessment in the context of a DNO application

In a propriety assessment, we check criminal records to determine whether candidates have been involved in criminal acts. Since not all criminal offences are included in the Dutch judicial system, we will need a criminal records extract from some of the candidates that are assessed for propriety in the context of a DNO application.

The following candidates are required to submit a criminal records extract:

- Candidates having Dutch nationality who have resided outside the EU at any time during the past eight years.
- Candidates having non-Dutch nationality who have resided outside the Netherlands at any time during the past eight years.

A. Candidates having Dutch nationality

B. Candidates having non-Dutch nationality
